Tertiary Infotech Academy Pte Ltd
UEN: 201200696W

LESSON PLAN

For

Microsoft Azure Fundamentals (AZ-900)

TGS Ref No: TGS-2023036449
Conducted by
Tertiary Infotech Academy Pte Ltd
UEN: 201200696W
Version 2.0

DOCUMENT VERSION CONTROL RECORD

Version Number	Effective Date of Release	Summary of Included Changes	Author
1.0	8 July 2026	First AZ-900 build aligned to 16 hands-on labs.	Tertiary Infotech Academy Pte Ltd
2.0	26 August 2026	Expanded to a mechanism-led visual deck aligned to the July 2026 AZ-900 blueprint; refreshed slide mappings and assessment schedule.	Tertiary Infotech Academy Pte Ltd

Course Overview

This two-day (16-hour) WSQ course develops foundational Azure decision-making through mechanism-led instruction and sixteen connected labs. The deck teaches architecture, contracts, failure modes and evidence; the Learner Guide carries the detailed click-by-click procedures.

Learning Outcomes

- LO1: Assess cloud solutions and specifications for Azure cloud computing.
- LO2: Develop an implementation plan for Azure cloud computing.
- LO3: Develop review processes to resolve Azure cloud implementation issues.

Daily Schedule

Day 1 · Cloud concepts, architecture and core services

Time	Duration	Topic / Activity	Method	Slides
9:00–9:30	30 min	Welcome, attendance, outcomes and assessment briefing	Visual briefing	Slides 1–10
9:30–10:10	40 min	Lab 1 · Portal and resource group	Demonstration + lab	Slides 24–25
10:10–10:50	40 min	Lab 2 · Cloud Shell	Mechanism + lab	Slides 26–27
10:50–11:00	10 min	Break	—	—
11:00–11:45	45 min	Lab 3 · Regions and availability zones	Decision model + lab	Slides 28–29
11:45–12:30	45 min	Cloud models, pricing, service types and serverless	Models + editable chart	Slides 13–30
12:30–1:15	45 min	Lunch	—	—
1:15–2:00	45 min	Lab 4 · Windows VM	Architecture + lab	Slides 54–55
2:00–2:45	45 min	Lab 5 · Linux VM with CLI	Workflow + lab	Slides 56–57
2:45–3:30	45 min	Lab 6 · App Service	Hosting decision + lab	Slides 58–59
3:30–3:40	10 min	Break	—	—
3:40–4:25	45 min	Lab 7 · Container Instances	Container contract + lab	Slides 60–61
4:25–5:10	45 min	Lab 8 · Virtual networking	Network model + lab	Slides 62–63
5:10–6:00	50 min	Architecture and services decision recap	Case comparison + review	Slides 31–63

Day 2 · Data, identity, governance, monitoring and assessment

Time	Duration	Topic / Activity	Method	Slides
9:00–9:40	40 min	Lab 9 · Blob Storage	Storage decision + lab	Slides 64–65
9:40–10:20	40 min	Lab 10 · Azure SQL	PaaS contract + lab	Slides 66–67
10:20–10:30	10 min	Break	—	—
10:30–11:10	40 min	Lab 11 · Microsoft Entra ID	Identity trace + lab	Slides 68–69
11:10–11:50	40 min	Lab 12 · Azure RBAC	Access tuple + lab	Slides 88–89
11:50–12:30	40 min	Identity, authentication and security controls	Comparison + control model	Slides 60–89
12:30–1:15	45 min	Lunch	—	—
1:15–1:50	35 min	Lab 13 · Tags and locks	Governance + lab	Slides 90–91
1:50–2:25	35 min	Lab 14 · Azure Policy	Policy trace + lab	Slides 92–93
2:25–2:35	10 min	Break	—	—
2:35–3:10	35 min	Lab 15 · Cost	Cost model + lab	Slides 94–95

Time	Duration	Topic / Activity	Method	Slides
		management		
3:10–3:45	35 min	Lab 16 · Monitoring and cleanup	Telemetry trace + lab	Slides 96–97
3:45–4:00	15 min	Course recap and assessment readiness	Review	Slides 97–100
4:00–5:00	60 min	Written Assessment (WA/SAQ)	Open-book individual assessment	—
5:00–6:00	60 min	Practical Performance (PP)	Open-book individual assessment	—

Topic-by-Topic Breakdown

Domain 1 · Describe Cloud Concepts · Slides 13–30

Exam weighting: 25–30%. Cloud models · economics · benefits · service types.

Lab 1 · Tour the Azure Portal and Create Your First Resource Group · Slides 24–25

Resource group exists in Southeast Asia with course=az900 and no unexpected resources.

Lab 2 · Get Started with Azure Cloud Shell · Slides 26–27

CLI and PowerShell return the same subscription and rg-az900-labs state.

Lab 3 · Explore Regions, Region Pairs and Availability Zones · Slides 28–29

Learner can name region, zone and region-pair boundaries and justify the lab region.

Domain 2 · Describe Azure Architecture and Services · Slides 31–70

Exam weighting: 35–40%. Global infrastructure · compute · networking · storage · identity.

Lab 4 · Create a Windows Virtual Machine in the Portal · Slides 54–55

VM overview is healthy and the IIS page is reachable only through the intended rule.

Lab 5 · Create a Linux VM with Azure CLI · Slides 56–57

az vm get-instance-view reports running before the web test; cleanup leaves no attached VM resources.

Lab 6 · Create a Web App with Azure App Service · Slides 58–59

HTTPS endpoint serves the deployed page and the deployment log shows success.

Lab 7 · Deploy a Container with Azure Container Instances · Slides 60–61

Container state is Running, logs are readable and the FQDN returns expected content.

Lab 8 · Create a Virtual Network and Test Private Connectivity · Slides 62–63

Web VM reaches data VM over private IP while the data VM has no public IP.

Lab 9 · Create a Storage Account and Work with Blob Storage · Slides 64–65

Anonymous access fails, SAS access succeeds within its scope and the blob tier reads back correctly.

Lab 10 · Create an Azure SQL Database · Slides 66–67

Query returns rows from the sample database and firewall scope matches the intended client.

Lab 11 · Explore Microsoft Entra ID Users and Groups · Slides 68–69

Test user can authenticate but cannot manage subscription resources without RBAC assignment.

Domain 3 · Describe Azure Management and Governance · Slides 71–98

Exam weighting: 30–35%. Cost · governance · deployment · monitoring.

Lab 12 · Manage Access with Azure RBAC · Slides 88–89

Reader can view rg-az900-labs but cannot create or delete resources; assignment is removed after the test.

Lab 13 · Apply Resource Tags and Resource Locks · Slides 90–91

Tags read back at intended scopes and the lock blocks deletion until explicitly removed.

Lab 14 · Enforce Standards with Azure Policy · Slides 92–93

A disallowed-region deployment is denied and the assignment/compliance state is visible.

Lab 15 · Estimate and Control Costs · Slides 94–95

Estimate assumptions are saved and a budget exists with an accountable notification route.

Lab 16 · Monitor Your Environment and Complete Cleanup · Slides 96–97

Monitoring evidence is captured and final resource inventory contains no unintended billable lab resources.

Resources Required

- Learner Azure subscription or authorised training tenant
- Modern browser and reliable internet access
- Azure Portal and Azure Cloud Shell
- Learner Guide and labs/ folder
- LMS access for courseware, attendance and assessment

Assessment

Day 2, 4:00–6:00 PM: Written Assessment (SAQ), 1 hour, followed by Practical Performance, 1 hour. Both are individual, open-book assessments. Candidate papers are submitted through https://lms-tms.tertiaryinfotech.com/. Answer keys remain trainer-only.
